Overview: Finishes vary in material requirements, application time & degree of difficulty. The complexity of the finish determines the designated category. Each item has a predetermined level of distressing. The wood species used to construct an item & the level of distressing shall remain constant, regardless of the finish selected.

Note: Due to the inherent difficulties of working within confined spaces of cabinet interiors, an interior finish will include all finishing steps except secondary detailing such as spatter, cow-tailing, hand-padding & texturing.

Within this Finish selection there are three levels of finishes varying in application time & difficulty. The complexity of the finish is reflected in the terms Standard, Premium, & Artisan.

Combination Finishes: Many items may be ordered in a two-tone combination finish. The suffix code for combination finishes is -00 followed by the desired finish codes & names along with the areas of application & a sketch if needed.

Color Match Program (available only on casegoods): Add your favorite paint color to our furniture with Color Match. With thousands of colors to choose from, it has never been easier to incorporate your unique style.

The suffix code for a Color Match item is -CM. Color Match items are priced at the Premium level. To Color Match an item, simply provide us with the Paint Company, Paint Name & Number, & attach a finish chip to your purchase order.

Striping

Many items lend themselves to hand-striping applications which can enhance the design & customize the piece to one's individual taste. Striping patterns are predetermined by the factory. Special striping pattern requests may be submitted for approval & may require a sketch & additional charges if deemed necessary.
